FOREWORD

This edition of the MIDDLE EAST AND NORTH AFRICA, the 67th in print, provides comprehensive coverage of political and economic life at the regional, subregional and national levels. The volume is divided into three separate, though complementary, sections. In Part One a collection of introductory essays discusses the most pertinent issues affecting the region. Topics covered include China's current and historic links with the Middle East, Saudi-Iranian relations, US regional policy, the growth of political Islam and the intellectual origins of the movement, the challenges arising from the Syrian refugee crisis, and the issue of Kurdish political autonomy and identity. In Part Two specialist authors, researchers and commentators examine in detail the main political and economic events in each of the countries and territories in the region. In addition, all statistical and directory material has been thoroughly updated. Extensive coverage of international organizations and research bodies active in the Middle East and North Africa is included in a section of Regional Information, together with a comprehensive archive of documents related to the history of Israel and the Palestinian Territories, and bibliographies of essential publications for further study. A calendar of the key political events of 2019–20 enables rapid reference to the year's main developments.

The year under review was, as ever, an eventful one for the countries of the Middle East and North Africa. Arab—Israeli relations returned to the foreground, when US President Donald J. Trump announced that the United Arab Emirates (UAE) had agreed to normalize its political and economic relations with Israel, in exchange for Israel's Government suspending its intended annexation of territory in the occupied West Bank. In September 2020 the UAE was joined by Bahrain in signing the Abraham Accords Peace Agreement with Israel at a ceremony in the US capital, Washington, DC. The Accords marked a potential recalibration of regional relations, amid an alignment of Israeli and Gulf Arab concerns over Iran. Meanwhile, regional interventions by an increasingly assertive Turkey were also a potential cause of friction: in November 2019 an agreement between Turkey and the Government of National Accord (GNA) in Libya over maritime sovereignty in the eastern Mediterranean Sea prompted denunciations from the governments of Cyprus, Egypt and Israel. Moreover, Turkish military intervention on behalf of the GNA from January 2020 further antagonized Egypt and the UAE, who were among the backers of the rival Libyan National Army.

Elsewhere in the region, Lebanon was beset by a political and economic crisis. Large-scale protests against perceived economic mismanagement forced the Government to resign in October 2019 and in August 2020 a massive explosion in the capital, Beirut, caused the deaths of at least 190 people, widespread damage to property and the displacement of some 300,000 people. Subsequent accusations of government failure led to French-brokered attempts to form a technocratic cabinet with a mandate for reform. However, by the end of September those attempts had reached an apparent impasse, owing to disagreement among the leading political parties. In Oman, Sultan Qaboos bin Said al-Said—who had ruled the country since 1970—died in January 2020 and was succeeded by his cousin, Haitham bin Tarik al-Said.

Overshadowing all this, however, was the novel coronavirus disease (COVID-19) pandemic of early 2020. Iran was among the most affected countries worldwide, with more than 450,000 cases of COVID-19 and almost 26,000 related deaths recorded by 30 September, while in Israel a second so-called 'lockdown' was implemented from September amid a steep rise in cases. The economic impact of these measures was also severe.

The entire content of the print edition of THE MIDDLE EAST AND NORTH AFRICA is available online at www.europaworld.com. This prestigious resource incorporates sophisticated search and browse functions as well as specially commissioned visual and statistical content. An ongoing programme of updates of key areas of information ensures currency of content, and enhances the richness of the coverage.

The Editors would like to express their thanks to all the contributors for their articles and advice, as well as to the numerous governments and organizations that provided statistical and other information.

October 2020

V

ACKNOWLEDGEMENTS

The Editors gratefully acknowledge the interest and co-operation of numerous national statistical and information offices, and government departments, as well as embassies in London and throughout the region, whose kind assistance in updating

the material contained in the MIDDLE EAST AND NORTH AFRICA is greatly appreciated.

We acknowledge particular indebtedness for permission to reproduce material from the following publications: the United Nations' statistical databases and Demographic Yearbook, Statistical Yearbook and Monthly Bulletin of Statistics; the United Nations Educational, Scientific and Cultural Organization's Institute for Statistics database; the Human Development Report of the United Nations Development Programme; the Food and Agriculture Organization of the United Nations' statistical database; the statistical databases of the World Health Organization; the statistical databases of the UNCTAD/ WTO International Trade Centre; the International Labour Office's statistical database; the World Bank's statistical databases, especially the World Development Indicators database, and the World Development Report; the International Monetary Fund's statistical database, International Financial Statistics and Government Finance Statistics Yearbook; the World Tourism Organization's Tourism Highlights and Yearbook of Tourism Statistics, 2020 edition, UNWTO, Madrid; the US Geological Survey; the International Telecommunication Union; the United Nations Economic and Social Commission for Western Asia's National Accounts Studies of the ESCWA Region; Lloyd's List; and The Military Balance 2020, a publication of the International Institute for Strategic Studies, Arundel House, 6 Temple Pl., London, WC2R 2PG, UK. We are also grateful to the Israeli embassy, London, for the use of two maps illustrating the disengagement agreements between Israel and Egypt, and Israel and Syria (both 1974).

The following publications have been of special value in providing regular coverage of the affairs of the Middle East and North Africa region: Maghreb Confidential and Middle East Economic Digest.

HEALTH AND WELFARE STATISTICS: SOURCES AND DEFINITIONS

Total fertility rate Source: WHO Global Health Observatory. The number of children that would be born per woman, assuming no female mortality at child-bearing ages and the age-specific fertility rates of a specified country and reference

Under-5 mortality rate Source: WHO Global Health Observatory. Defined by WHO as the probability of a child born in a specific year or period dying before reaching the age of five, if subject to the age-specific mortality rates of the year or period. HIV/AIDS Source: UNAIDS. Estimated percentage of adults aged 15 to 49 years living with HIV/AIDS. < indicates 'fewer than'.

Health expenditure Source: Global Health Expenditure database. Covering the provision of health services (preventive and curative), family planning activities, and nutrition activities. Public sources include domestic revenue as internal transfers and grants, transfers, subsidies to voluntary health insurance beneficiaries, non-profit institutions serving households (NPISH) or enterprise financing schemes as well as compulsory prepayment and social health insurance contributions. External grants or loans for healthcare provided by international agencies and other national authorities are

US \$ per head (PPP)

International dollar estimates. Current domestic general government expenditures as a ratio of total population.

The share of domestic general government resources used to funs health expenditures, given as a percentage of the economy as measured by gross domestic product (GDP). The managed part of the greed of the g

Public expenditure % of total expenditure
Share of current health expenditures funded from general government sources, social health insurance and compulsory

Access to water and sanitation Source: WHO/UNICEF Joint Monitoring Programme on Water Supply, Sanitation and Hygiene (JMP) (Progress on Household Drinking Water, Sanitation and Hygiene, 2000-17). Defined in terms of the percentage of the population using improved facilities in terms of the type of technology and levels of service afforded. For water, this includes house connections, public standpipes, boreholes with handpumps, protected dug wells, protected spring and rainwater collection; allowance is also made for other locally defined technologies. Sanitation is defined to include connection to a sewer or septic tank system, pour-flush latrine, simple pit or ventilated improved pit latrine, again with allowance for acceptable local technologies. Access to water and sanitation does not imply that the level of service or quality of

Carbon dioxide emissions Source: World Bank, World Development Indicators database, citing the Carbon Dioxide Information Analysis Center (sponsored by the US Department of Energy). Emissions comprise those resulting from the burning of fossil fuels (including those produced during consumption of solid, liquid and gas fuels and from gas flaring) and

Human Development Index (HDI) Source: UNDP, Human Development Report (2019). A summary of human development measured by three basic dimensions: prospects for a long and healthy life, measured by life expectancy at birth; knowledge, measured by adult literacy rate (two-thirds' weight) and the combined gross enrolment ratio in primary, secondary and tertiary education (one-third weight); and standard of living, measured by GDP per head (PPPUS\$). The index value obtained lies between zero and one. A value above 0.800 indicates very high human development, between 0.700 and 0.799 high human development, between 0.550 and 0.699 medium human development, and below 0.550 low human development. A centralized data source for all three dimensions was not available for all countries. In some cases other data sources were used to calculate a substitute value; however, this was excluded from the ranking. Other countries, including non-UNDP members, were excluded from the HDI altogether. In total, 189 countries were ranked for 2018.
